(54) Title: FERMENTATIVE PRODUCTION OF VALUABLE COMPOUNDS ON AN INDUSTRIAL SCALE USING CHEMICALLY
DEFINED MEDIA

(57) Abstract

The present invention describes the use of chemically defined media for the fermentative production of valuable compounds on an industrial scale. Microbial strains which are suitable for fermentation on an industrial scale using a chemically defined medium include fungal, yeast and bacterial strains. Suitable strains can be obtained as wild type strains or by screening and selection after mutagenic treatment or DNA transformation.
